

# Svitoni® Siltex Socks

- produced from Prolen® Siltex

## Prolen® Siltex

- special yarn modified by an antibacterial additive on the basis of biogenic silver ions
- silver ions inhibit the growth of bacteria, funghi and moulds
- the antibacterial effect of silver has been known since the Ancient Rome
- reduces unpleasant smells
- keeps biological balance of the skin
- ensures ideal thermoinsulation
- transports moisture
- keeps hygienic freshness of your feet during sports and leisure activities
- great for people with allergies
- the antibacterial agent permanently remains in the sock even after multiple washing
- completely recyclable

fresh comfort for your feet
